HOME AUTOMATION & GUEST ROOM MANAGEMENT SYSTEM

The Home Automation/ Guest Room Management System (GRMS) provides an innovative and efficient way to control the lighting, heating/cooling, curtains, TV, Music System, Radio and hotel guest services through intuitive buttons or touch screen/panel interfaces. It may also include home security such as access control and alarm systems. A Home Automation/ GRMS system typically connects controlled devices to a central hub.

The solution provided by Aman could be installed across personal properties such as residential apartment, villas and condominium to commercial properties such as hotels, resorts & villas. With this solution clients could have a control over their property and be able to provide their guests with comfort. Our solution includes the automation of;

- LIGHTING CONTROL SYSTEM SMART
- Light management (ON/OFF or dimmer)
- Curtains and Rollers
- HVAC system
- Launch of ambiance and comfort scenes
- Manage services as "Do Not Disturb" (DND) or "Make Up Room" (MUR)
- Presence/absence of the guest in the room
- Communication with third-party systems as supervisors, access controls, PMS, Smartphones/tablets, TV and so on

SMART LIGHTING CONTROL SYSTEM

Lighting is no longer just a utility for your home. It's an aesthetic that creates an ideal movie-viewing experience for your family, provides an ambiance that is lively for a gathering of guests, adds cheer to your holiday season, and even sets the perfect mood for a date night. A lighting control system is an intelligent network based on lighting control solution that incorporates communication between various system inputs and outputs related to lighting control with the use of one or more central computing devices.

At Aman we provide solution from simple wall mounted dimmers to a more complexed lighting management system depending on what our clients request from us. Our sophisticated lighting management solution with a centralized and a remote access to connected lighting systems provide the best illumination experiences, maximize energy efficiency and resiliency. These solutions ideally suits clients who seek extraordinary value beyond simple illumination.

AUDIO & VISUAL SOLUTION

ENHANCING THE USER EXPERIENCE

Aman AV division specializes in providing state of the art AV solutions which caters to wider range of audiences. Over the years we have worked on some of the most prestigious projects in Qatar.

Our team consist of individuals who has handful of experience specializing in the AV industry. This makes us one of the most preferred AV solution provid-ers in Qatar. May it be a small project for a VIP client or a large project for one of the leading business entity/ brands in Qatar, we rely on our project management team, AV engineers and designers to provide the most up to date technology available in the market.

In our drive towards providing the best possible solution to our clients, we are not limited to brands available in Qatar but also able to provide brands which are available in other regions as per our client's requirement. This is possible only through our reputa-tion in the market and the connection we have developed over the past years dealing with key industry players.

A Professional Audio Visual equipment could make all the difference for an organization. The right technology used in the right way could bring professionalism to any projects and presentation which is created. Having been in the industry providing customized solutions, at Adept tech we understand the fact that our clients need easy to use solutions combined with versatility. Our solutions help clients with conveying their key messages efficiently and effectively both in person and virtually creating enhanced audience experience.

PORTFOLIO

At Aman we have the internal technical skills and the external industry relationships through which we can provide complete commercial solutions needed to be competitive and efficient in this modern, ever changing world.

CONTROL ROOM

Control room solution brings together multiple information materials in real-time. In our complete solution we help our clients to visually monitor and control data on a large scale. Our solution consist of video wall, operation console and custom components would be added as per the project requirement or client's request.

ROOM BOOKING SYSTEM

When it comes to booking meeting rooms and conference areas, there is always confusion. Our room booking system allows users to manage bookings locally and remotely allowing everyone within an organization know about the availability of the space and meeting patterns which enables the organization to better allocate resource within an organization..

DIGITAL SIGNAGE INDOOR AND OUTDOOR

Digital signages are an integral part of modern day advertising and mass communication. This advertising medium has gained its popularity among business community because of the fact that the communication messages can be changed as required through remote access.

Apart from providing display screens of various types and sizes, we also provide solutions such as interactive screens, digital notice boards, kiosks, interactive shop window display and many more.

VIDEO CONFERENCING SYSTEM

Whether you are a small company or a large organization with operation in multiple locations, video conferencing systems are an ideal way to bring great ideas into life.

With advanced technology it is easier to do video conferencing from the comfort of your mobile device or your desktop. Video conferencing systems are the go-to solution when you need to cover a larger audience. The all-in-one solution which we provide typically suited for conference rooms or classrooms and could be scaled up with multiple devices and projector as per the client's requirement

AUDIO MIXING AND DISTRIBUTION SOLUTION

Microphones, audio sources, mixing desks, processors, amplifiers, speakers, everything needed to guarantee optimum sound quality.

Designed to ensure that all members of the audience receive high quality sound, the audio system makes use of all elements necessary for optimizing the reception, mixing, processing and distribution of the sound signals, as well as their suitable reproduction for the audience.
